Sample ID SD230907-011 (84197)	Matrix Concentrate (Inhalable Cannabis Good)				
Tested for Wherezhemp, LLC					
Sampled -	Received Sep 06, 2023	Reported Sep 08, 2023			
Analyses executed CANX, AMU					

Laboratory note: The estimated concentration of the unknown peak in the sample is 197% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC, (+)d8-THC is a different compound from the main (-)d8-THC canabinaid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 concentration is estimated to be 5.5.3%
